Notes:

- Approved for hotel / restaurant use:
EN 1022:2005, EN 16139:2013
- Felt gliders.
- Seat in paper cord.
The weaving is a traditional Danish triangle shape used for generations. Since cords need to overlap it is not possible to make four triangles that meet exactly in the middle - they will always overlap. Also, the four lines going from the edge of the seat to the center will never be 100 pct. straight. This is a handmade product and part of the character of the chair.

General information

Employees

We employ a variety of people with different backgrounds, education, ethnicity, age and gender.

Education

We employ a large number of trainees and apprentices to support the industry's future.

Union

We follow the collective agreement for the largest trade union in Denmark (3F) to secure workers' rights in the production team.

Safety

Our health and safety regulation are audited on a regular basis by the Danish Working Authority.

Insurance

We offer extra health insurance for our employees and their families.

Wood

We only use certified wood - FSC © or PEFC ©.

Wind Power

Our factory buys electricity from suppliers, where the greatest possible electricity comes from Danish wind farms. This means that we only buy certified Co2 neutral electricity.

Heating

We use waste wood to generate heat - minimizing our carbon footprint.

Local

We prioritize local suppliers to minimize transport emissions.

Packaging

We only use recyclable cardboard and plastic in packaging.

Wood

Wood & Treatments

We use only certified wood from high quality suppliers. Our craftsmen choose carefully the wood for each piece of furniture. Selected wood sorts for each piece of furniture can be seen under product pages. Please note that all the models are not available in all species.

Natural Oak

North European Oak is mostly straight grained with a medium to coarse texture. It is widely used in Scandinavian furniture because of its strength.

Black Painted Oak

Paint with a semi matt finish. The grains of the oak is still visible. The top coat gives a hard protection and seals the wood.

Fumed Oak

We “home fume” every piece of furniture in our work shop. Every log has different reaction to the fuming so the color varies across each furniture.

Natural Beech

The grain of the natural beech is straight, with a fine to medium uniform texture. It is strong and durable with a good resistance to abrasion.

Oak White Oiled

Light pigments give the grains a brighter tint. It is water-repellent, dirt-resistant and durable.

Oiled Beech

Oil is developed from natural oils and waxes to provide the most durable protection. It brings out the warmth and depth of the wood.

Oiled Oak

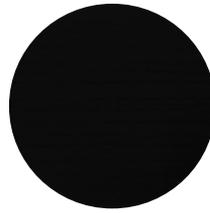

Oil is developed from natural oils and waxes to provide the most durable protection. It brings out the warmth and depth of the wood.

Wood

Red Lacquered Oak

The colour and a polyurethane top coat is applied to give a semi matt finish. Lacquered ash is durable and resistant against water, moist and heat.

Black Lacquered Oak

The colour and a polyurethane top coat is applied to give a semi matt finish. Lacquered oak is durable and resistant against water, moist and heat.

Oiled Walnut

We use an American walnut because of its luxurious dark brown colour and its grain is revealed by a wax oil treatment.

Green Lacquered Oak

The colour and a polyurethane top coat is applied to give a semi matt finish. Lacquered oak is durable and resistant against water, moist and heat.

Oiled Cherry

American cherry is a supreme hardwood species from the U.S. hardwood forests and is unique to North America, with warm colour tones and superb finishing qualities.

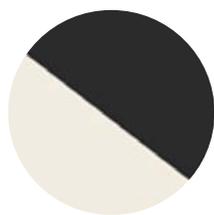

White Oiled Maple

Growing naturally in the hardwood forests of North America, Maple is one of the most prolific and sustainable species with creamy to pale reddish brown and grained with a fine texture.

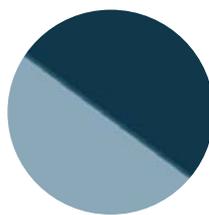

Compact Laminate

Compact laminate is made of special paper compressed into a firm tabletop in the process of high pressure and heat. We only use certified compact laminate of the highest quality, which our craftsmen carefully select for Bølling Tray Table. Each side of the compact laminate has a different colour. Each colour combination is selected to suit all the types of wood we use for Bølling Tray Table.

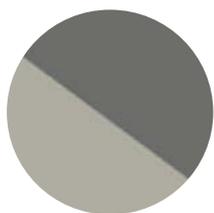

BASE

The classic model with Black and White trays has been discretely adjusted for softer contrast and a bit of warmth.

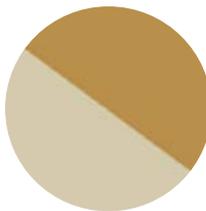

WATER

A deep marine Blue note that, like an anchor, brings calm and soothing tones to any context. On the reverse side of Water, is a brighter airy Blue, that uplifts with light contrast and tone-in-tone variation.

STONE

Two classic shades of slightly warm Grey, that will complement most settings. Each side of Stone has its own light and dark grey. In combination they bring subtle and soft contrasts.

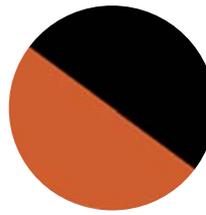

SUNNY

The warm Ochre Yellow is a reminiscent of ancient pigment colours, yet with vibrant energy. On the other side of the reversible tray, Sunny has a light creamy tone, that adds contrast and variation.

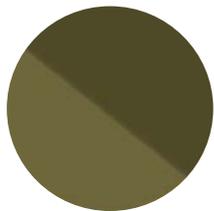

EARTH

A light caramel Beige that perfectly matches the natural tones of the oakwood frame, and comes across as monochrome, warm and modern. On the other side of the reversible tray, Earth has a dark chocolate Brown.

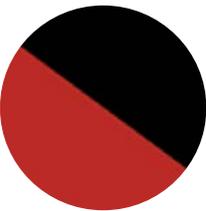

CLAY

This vibrant burnt Orange has classic notes of terracotta and cognac leather, both complementing and uplifting its interior context. On the other side of the tray, Clays has an off-Black.

LEAF

Two shades of green make up the Leaf colourway. On one side of the tray is a deep dark moss-like Green, and on the other; a lighter olive Green. In combination, the two greens complement each other with soft contrast.

RED

The warm red and black provide a classic contrast and variation that both complementing and uplifting its interior context.

Upholstery

Fabric

We create a simple selection of fabrics and leather from the world's best producers considering the quality, sustainability, ethics and safety of their products. All the leathers are chosen carefully from [Sørensen Leather](#) which are originated from European rawhide and fabric from [Kvadrat](#).

Moss by Sahco , 0019
